- Communication
- Problem-solving
- Collaboration
- Creative thinking
- Application programming

Highlighted Projects

Moonrise Media Entertainment Ecommerce Platform

<https://github.com/nrobert444/Moonrise-Media-Store>

MongoDb | React | Redux | NodeJS | Express

Full-Stack Ecommerce platform built to supplement Moonrise Media's online presence. This app integrates PayPal's API, Authentication with BcryptJs, State management with Redux and admin functionality for performing CRUD operations on users, products and orders.

Earth Force Disaster Tracker

<https://github.com/smart-invester>

React | Node | Express | SQL

Earth-Force Natural Events Tracker allows you to find current and historical natural weather events, track those events, and connect with resources that aid in disaster relief. This app was built in a 4-day sprint with a team of six and utilizes the NASA EONET API and Google maps.
